

Introduction

The Aeronav and Micronav Dev kits' purpose is to expose the user to the functionality and operation of what UXV Technologies has to offer. UXV Technologies Dev kits are an important first step for users to test and experiment with their control requirements in order to discover a solution for a custom GCS that will suit their needs.

Before getting started please ensure that your Dev Kit has no cracks, scratches or any visible faults

Dev Kit Set Up

To set up the Aeronav or Micronav Dev Kit is very simple. Power on your dev kit and input the following password:

Aeronav

- aeronav

Micronav

- micronav
